FORm_office™
UPPER STORAGE OPTIONS

UPPER STORAGE OPTIONS

In today's condensed, open plan office environments, storage volume has been significantly reduced. Overheads have been eliminated, and desktop space has become a premium.

The many unique and stylish above-worksurface storage elements available with FORm_office mitigate the storage limitations of the new workplace. In addition to storage capacity, these above-worksurface elements provide some personal privacy and space demarcation.

All of the storage elements within FORm_office are completely modular and can be easily installed or moved without the use of tools.

Personal or shared storage at desktop level can be achieved through the use of central storage units, desktop storage units, or center well storage infills. Positioning of storage units is unrestricted. Both series of options snap tool-free into the accessory mounting beam at the back of each work surface and are easily repositioned.

To preserve LEED credit 8.1, 8.2 and 8.3, upper storage should not exceed 42”H (off the floor.)

CENTRAL STORAGE UNITS [premium]

TECHNICAL DETAILS

| | |
|--------------------------|---|
| STANDARD CORE MATERIALS: | ¾" MDF, mitered construction |
| STANDARD FINISHES: | HP laminate with cast polyurethane front edges, veneer with hardwood edge |
| STANDARD FOOTPRINT: | 18"W x 12"D |
| STANDARD HEIGHTS: | 7" (for low height units) and 14" (for binder height units) |

TOP LEFT: Premium example of double stacked low personal storage units (with tackable rear surface).

TOP RIGHT: Premium example of binder height personal storage unit.

BOTTOM: Premium example of shared personal binder height storage unit.

CENTRAL STORAGE UNITS [basic]

TECHNICAL DETAILS

| | |
|--------------------------|---|
| STANDARD CORE MATERIALS: | 3/4" MDF, butted/overlap construction |
| STANDARD FINISHES: | HP laminate with 3mm edgeband, veneer with hardwood edge |
| STANDARD FOOTPRINT: | 18"W x 12"D |
| STANDARD HEIGHTS: | 7" (for low height units) and 14" (for binder height units) |

TOP LEFT: Basic example of low height storage unit.

TOP RIGHT: Basic example of shared personal binder height storage unit.

BOTTOM: Basic example of double stacked low personal storage units (with tackable rear surface).

DESKTOP STORAGE UNITS

TECHNICAL DETAILS

STANDARD CORE MATERIALS:

3/4" MDF, mitered or butt joint construction

STANDARD FINISHES:

HP laminate with 3mm PVC or polyurethane edges, veneer with hardwood edge

DIMENSIONS:

Made to suit requirements

Tailored millwork desktop storage units.

CENTER WELL STORAGE INFILLS

TECHNICAL DETAILS

| | |
|----------------------------|------------------|
| STANDARD MATERIALS/FINISH: | Powder coat |
| STANDARD WIDTH: | 3.5"W |
| STANDARD LENGTHS: | 12" or 18"L |
| STANDARD DEPTHS: | 1"D shallow tray |

Shallow infill storage trays hold office supplies and personal effects.

INNOVANT

OUR STORY

Innovant designs and manufactures intelligent office furniture for the modern workplace. A recognized leader in the industry, we focus on integrating seamlessly into the overall architecture of a space, optimizing real estate, promoting employee productivity, and ensuring long term value to the client business. Innovant's adaptable open plan workstations, conference solutions, private office designs and specialty furnishings are available to view in showrooms worldwide.

We know that our clients navigate complex decisions when choosing a furniture system. Innovant provides expert guidance along the way, collaborating with client teams to determine optimal product configurations. Where appropriate, we will recommend and engineer tailored solutions based on specific client requirements. Every Innovant product is designed for efficient installation and easy reconfiguration over time as new features are introduced.

SUSTAINABILITY

Environmental stewardship is a primary component of Innovant's core philosophy. One of our key missions is to minimize our impact on the environment and to ensure our products are environmentally sustainable. All of our standard products already conform to a variety of eco-requirements and many items can be further configured to maximize LEED points.
