FORM\_office™  
WORKTOP EXTENSIONS

# WORKTOP EXTENSIONS

Through the use of worktop extensions - supported off the primary bench work surfaces - clients can expand their space planning options beyond simple linear benching. Whether cantilevered off the ends of bench runs or supported by table legs, FORM\_office worktop extensions are easily specified and installed on day one or day two.

Clever cable management options are available when required, as are privacy and modesty features.

# END EXTENSIONS

End extension work surfaces are available at the end of desk clusters to provide additional desk positions or a collaborative teaming space. Work surfaces are cantilevered off of the main bench frame and free of any leg supports. Cable management and delivery to the main cluster raceway and convenience power can be specified flush mounted into the surface.

Standard available depths are 20" and 24", limited to 60" widths with 3 mm nosing.

# RETURN EXTENSIONS

Return extension work surfaces are braced to the primary work surfaces on the main bench. They are also supported by the FORM\_office desk leg 1.5" x 1.5" Parsons Concept desk frame. Cable management and delivery to the main cluster raceway and convenience power can be specified flush mounted into the surface. Note, the polyurethane edgebanding is only applied to the side facing the user.

## OUR STORY

Innovant designs and manufactures intelligent office furniture for the modern workplace. A recognized leader in the industry, we focus on integrating seamlessly into the overall architecture of a space, optimizing real estate, promoting employee productivity, and ensuring long term value to the client business. Innovant's adaptable open plan workstations, conference solutions, private office designs and specialty furnishings are available to view in showrooms worldwide.

We know that our clients navigate complex decisions when choosing a furniture system. Innovant provides expert guidance along the way, collaborating with client teams to determine optimal product configurations. Where appropriate, we will recommend and engineer tailored solutions based on specific client requirements. Every Innovant product is designed for efficient installation and easy reconfiguration over time as new features are introduced.

## SUSTAINABILITY

Environmental stewardship is a primary component of Innovant's core philosophy. One of our key missions is to minimize our impact on the environment and to ensure our products are environmentally sustainable. All of our standard products already conform to a variety of eco-requirements and many items can be further configured to maximize LEED points.
